

ANDON PRODUCTION DISPLAY

Introducing

- **ANDON DISPLAY**
- **TARGET-ACTUAL DISPLAY**
- **TAKT TIME DISPLAY**
- **PRODUCTION COUNTER DISPLAY**

ABOUT PRODUCT

- Andon is a “visual control” device that shows machine, line, or process status. These displays help you to identify where to focus efforts, to get maximum efficiency from production lines. The indicators are intelligent and contain microcontroller-based embedded circuitry to handle production floor requirements.
- Andon can be used in any manufacturing industry with multiple production lines. It can also be used in large warehouses to monitor and manage packaging and storing. Automobile Industry vastly uses Andon Systems to expedite assembling cycles. Andon systems have varied usage in industrial applications.
- KVAR Tech Andon Production Systems are accurate, reliable, state of the art and Wifi-IoT enabled. KVAR Tech, offers varied production displays to show information such as production count, turnaround / takt time, shift count, total production efficiency and more.

FEATURES

- **Bright indication for immediate attention**
- **Email / SMS / Mobile notifications for quick alerts**
- **Built-in memory for logging events**
- **Windows-based PC software for logging**
- **Monthly / weekly / daily / shift wise reporting**
- **Cloud-based, Web-enabled**
