

LARGE DISPLAY INDICATOR

ABOUT PRODUCT

- In a plant there are many sensors used for measurement of various process parameters
- Considering the area of a plant, the Display needs to be much larger than normal 0.5" size displays to be seen from a distance. For this purpose, Large Display indicators are used. These Indicators are compatible with different types of sensors like thermocouple, RTD, pressure sensors, humidity sensors, strain gauges or load cells

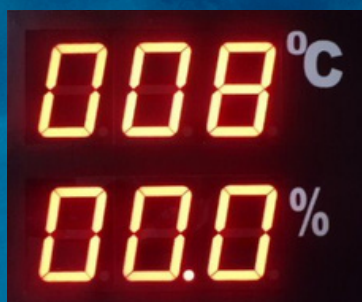

FEATURES

- Suitable for Indoor / Outdoor also in Single side/ Dual side Display
- Digit size from 0.5" - 12"
- Multiple colours viz Red, Parrot Green, Blue, White, Orange
- Various interfaces like RS232 , RS485, Modbus, TCP/IP, WiFi, GPRS for information update
- Possible to automatically update with data generated from ERP
- Connectivity Wired/ Wireless
