

MEGA-WATT INDICATOR (MW)

ABOUT PRODUCT

- Mega watt indicators are used mainly in power plants to display power generated by the plant. These indicators accept input from external power transducers either in 4-20mA or 0-10 or 0-1V range. The values are user scalable on site making the indicator universal and independent of the transducer rating
- KVAR Tech Displays are accurate, reliable, state of the art and WiFi-IoT enabled. They display messages and information digitally in a hassle-free way

FEATURES

- Suitable for Indoor / Outdoor also in Single side/ Dual side Display
- Digit size from 0.5" - 12"
- Multiple colours viz Red, Parrot Green, Blue, White, Orange
- Various interfaces like RS232 , RS485, Modbus, TCP/IP, WiFi, GPRS for information update
- Possible to automatically update with data generated from ERP
- Connectivity Wired/ Wireless

Our Indicators

Temp-Humidity Indicator | Large Display Indicator | Jumbo Indicator | RPM Indicator
