

TEMPERATURE HUMIDITY INDICATOR

ABOUT PRODUCT

- Temperature and Humidity are important parameters to be monitored in any industry. Temperature Humidity indicator combines both the displays in one allowing only one indicator to be used instead of two separate indicators
- Indicator accepts input from RTD sensor or a combined temperature humidity sensor. The accuracy of the display is decided by the accuracy of the sensors. Sensor output can be in 4-20mA range or 0-1 V or 0-10 V range. These are also available in flame proof, weatherproof IP65 or wall mount enclosures
- These displays are used in warehouses, pharmaceutical industries, laboratories, paper industries, cleaning rooms and many such industries

FEATURES

- Suitable for Indoor / Outdoor also in Single side/ Dual side Display
- Digit size from 0.5" - 12"
- Multiple colours viz Red, Parrot Green, Blue, White, Orange
- Various interfaces like RS232 , RS485, Modbus, TCP/IP, WiFi, GPRS for information update
- Possible to automatically update with data generated from ERP
- Connectivity Wired/ Wireless
